## Manual Reset Limit Switch D4D-DR

## A Series of Pull-reset Models Available

- The Switches, which feature a direct opening mechanism (NC contacts only), are equipped with lockable heads. Lock the Switch by moving the actuator to the lock position, and release the lock using the reset button.
- Conforms to EN (TÜV) standards corresponding to the CE marking. (Direct opening mechanism is shown by $\Theta$ on the Switch.)
- Approved by UL, CSA, BIA, and SUVA standards.
- Direct opening mechanism $\Theta$ and double insulation $\square$ approved by TÜV and BIA.

- Operates between $-30^{\circ} \mathrm{C}$ and $70^{\circ} \mathrm{C}$.

## Model Number Structure

## Model Number Legend

D4D- $\frac{\square}{1} \frac{\square}{2} \frac{\square}{3}$ R

1. Conduit

1: $\operatorname{Pg} 13.5$ (1-conduit)
2: $\quad$ G1/2 (1-conduit)
3: $1 / 2-14 N P T$ (1-conduit)
5: $\quad$ Pg13.5 (2-conduit)
6: G1/2 (2-conduit)
2. Built-in Switch

5: $1 \mathrm{NC} / 1 \mathrm{NO}$ (slow-action)
6: $\quad 1 \mathrm{NC} / 1 \mathrm{NO}$ (slow-action) gold-plated contacts
A: 2NC (slow-action)
B: $\quad 2 N C$ (slow-action) gold-plated contacts
3. Actuator

20: Roller lever
21: Adjustable roller lever
27: Adjustable roller lever (with rubber roller)
2H: Adjustable roller lever, form lock (with rubber roller)
31: Plunger
32: Roller plunger
62: One-way roller arm lever (Horizontal)
72: One-way roller arm lever (Vertical)

## Ordering Information

## List of Models

Switches

| Actuator | Conduit size (see note 1) |  | 1NC/1NO (Slow-action) |  | 2NC (Slow-action) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Direct opening (see note 2) | Model | Direct opening (see note 2) | Model |
| Roller lever | 1-conduit | Pg13.5 | $\Theta$ | D4D-1520R | $\Theta$ | D4D-1A20R |

|  |  | G1/2 |  | D4D-2521R |  | D4D-2A21R |
|  |  | 1/2-14NPT |  | D4D-3521R |  | D4D-3A21R |
|  | 2-conduit | Pg13.5 |  | D4D-5521R |  | D4D-5A21R |
|  |  | G1/2 |  | D4D-6521R |  | D4D-6A21R |
| Adjustable roller lever (with rubber roller) (See note 3) | 1-conduit | Pg13.5 | --- | D4D-1527R | --- | D4D-1A27R |
|  |  | G1/2 |  | D4D-2527R |  | D4D-2A27R |
|  |  | 1/2-14NPT |  | D4D-3527R |  | D4D-3A27R |
|  | 2-conduit | Pg13.5 |  | D4D-5527R |  | D4D-5A27R |
|  |  | G1/2 |  | D4D-6527R |  | D4D-6A27R |

Note: 1. It is recommended that Pg13.5 be used for Switches for Europe and 1/2-14NPT for North America.
2. The Switches are marked with $\Theta$ indicating approval for the direct opening mechanism.
3. Mechanically speaking, these models are basic limit switches.

## Specifications

## Approved Standards

Slow-action Models

| Agency | Standard | File No. |
| :--- | :--- | :--- |
| TÜV Rheinland | EN60947-5-1 EN81, <br> EN115 | R9451184 <br> (Direct opening: <br> approved) |
| UL (see note 1) | UL508 <br> CSA C22.2 No.14 | E76675 |
| BIA (see note 2) | GS-ET-15 | 1-conduit: 9505895 <br> 2-conduit: 9509914 |
| SUVA (see note 2) | SUVA | 1-conduit: E6337.d <br> 2-conduit: E6338.d |

## Standards and EC Directives

- Conforms to the following EC Directives: Machinery Directive Low Voltage Directive EN50047 EN1088

Note: 1. CSA C22.2 No. 14 compliance was verified and approved by UL (Marked with (UL)
2. Except for adjustable roller lever models.

## $\square$ Approved Standard Ratings

## Applicable Standards

TÜV (EN60947-5-1)

| Utilization category | AC-15 |
| :--- | :--- |
| Rated operating current $\left(\mathrm{I}_{\mathrm{e}}\right)$ | 2 A |
| Rated operating voltage $\left(\mathrm{U}_{\mathrm{e}}\right)$ | 400 V |

UL (UL508/CSA C22.2 No.14)
A600

| Rated voltage | Carry current | Current |  | Volt-amperes |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Make | Break | Make | Break |
| 120 VAC | 10 A | 60 A | 6 A | 7,200 VA | 720 VA |
| 240 VAC |  | 30 A | 3 A |  |  |
| 480 VAC |  | 15 A | 1.5 A |  |  |
| 600 VAC |  | 12 A | 1.2 A |  |  |

## Characteristics

| Degree of protection | IP65 (EN60947-5-1) |
| :---: | :---: |
| Durability (see note) | Mechanical: 1,000,000 operations min. Electrical: 150,000 operations min. |
| Operating speed | $1 \mathrm{~mm} / \mathrm{s}$ to $0.5 \mathrm{~m} / \mathrm{s}$ |
| Contact gap | $2 \times 2 \mathrm{~mm}$ min. |
| Operating frequency | 30 operations/min |
| Rated frequency | $50 / 60 \mathrm{~Hz}$ |
| Insulation resistance | $100 \mathrm{M} \Omega$ min. (at 500 VDC) between terminals of the same polarity, and between each terminal and non-current-carrying metal part |
| Contact resistance | $25 \mathrm{~m} \Omega$ max. (initial value) |
| Dielectric strength ( $\mathrm{U}_{\mathrm{imp}}$ ) | $\mathrm{U}_{\text {imp }} 4 \mathrm{kV}$ between terminals of the same polarity, between terminals of different polarity, and between each terminal and non-current-carrying metal part (EN60947-5-1) |
| Rated insulation voltage ( $\mathrm{U}_{\mathrm{i}}$ ) | 400 V (EN60947-5-1) |
| Switching overvoltage | 1,500 V max. (EN60947-5-1) |
| Pollution degree (operating environment) | 3 (EN60947-5-1) |
| Conditional short-circuit current | 100 A (EN60947-5-1) |
| Conventional enclosed thermal current ( $\mathrm{I}_{\text {the }}$ ) | 10 A (EN60947-5-1) |
| Protection against electric shock | Class II (double insulation) |
| Vibration resistance | Malfunction: 10 to 55 Hz , 0.75-mm single amplitude |
| Shock resistance | Destruction: $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. Malfunction: $300 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
| Ambient temperature | Operating: $-30^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ (with no icing) |
| Ambient humidity | Operating: 95\% max. |
| Weight | Approx. 80 g (for D4D-1120R) |

Note: The durability is for an ambient temperature of $5^{\circ} \mathrm{C}$ to $35^{\circ} \mathrm{C}$ and an ambient humidity of $40 \%$ to $70 \%$. Contact your OMRON sales representative for more detailed information on other operating environments.

| DOT min. (see note 6) | $50^{\circ}$ | $50^{\circ}$ | $50^{\circ}$ | 3.2 mm | 3.2 mm | 5.8 mm | 4.8 mm |

Note: 1. The operating characteristics of these Switches were measured with the roller lever set at 30 mm .
2. The operating characteristics of these Switches were measured with the roller lever set at 31 mm .
3. These PT1 values are possible when the NC contacts are OFF.
4. These PT2 values are possible when the NO contacts are ON (applicable to D4D- $\square$ R models with 1NC and 1NO contact each).
5. Reference value.
6. DOT (direct opening travel) and DOF (direct opening force) are required values for direct opening.

■ Contact Form

| Model | Contact |  | Diagram |  | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: |
| D4D- $\square 5 \square \mathrm{~N}$ | 1NC/1NO (slow-action) |  | $\begin{aligned} & 11-12 \\ & 23-24 \end{aligned}$ | Stroke <br> ON | Only NC contact 11-12 has an approved direct opening mechanism. <br> Terminals 11-12 and 23-24 can be used as unlike poles. |
| D4D- $\square$ A $\square \mathrm{N}$ | 2NC <br> (slow-action) |  | $\begin{aligned} & 11-12 \\ & 21-22 \end{aligned}$ | Stroke <br> ON | NC contacts 11-12 and 21-22 have an approved direct opening mechanism. <br> Terminals 11-12 and 21-22 can be used as unlike poles. |

Note: Terminals are numbered according to EN50013 and contacts are marked according to EN60947-5-1.

## Direct Opening Mechanism

## 1NC/1NO Contact (Slow-action)

Only the NC contacts have a direct opening function.
When metal deposition occurs, the contacts are separated from each other by pushing in the plunger.

Conforms to EN60947-5-1 Direct Opening

2NC Contact (Slow-action)

Both NC contacts have a direct opening function.
When metal deposition occurs, the contacts are separated from each other by pushing in the plunger.

Conforms to EN60947-5-1 Direct Opening

Note: The Switches are marked with $\Theta$ indicating approval for the direct opening mechanism.

## Nomenclature

[^0]
## Dimensions

Note: 1. All units are in millimeters unless otherwise indicated.
2. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
3. The minimum number of screw threads is five when the Pg13.5 conduit is used and four when the G1/2 conduit is used.

## Levers

Refer to the following for the angles and positions of the watchdogs.

## Precautions

## -1 Caution

Do not use metal connectors or conduits with this Switch. Rigid connectors and conduits may damage the Switch. The broken conduit hole may cause and electrical shock hazard.
If the D4D- $\square R$ is applied to a safety category circuit for prevention of injury, use the D4D- $\square$ R model that has an NC contact equipped with a direct opening mechanism, and make sure that the D4D- $\square$ R operates in the direct opening mode. Furthermore, secure the D4D- $\square$ R with screws or equivalent parts that are tightened in a single direction so that the D4D- $\square$ R cannot be easily removed. Then provide a protection cover for the D4D- $\square$ R and post a warning label near the D4D$\square \mathrm{R}$.
Ensure that the actuator is pushed into the lock position by, for example, setting up a dog. Not doing so may result in the actuator becoming unlocked and causing an accident.

When the Limit Switch locks due to a fault in the system, be sure to reset the Limit Switch manually before resupplying power after confirming the safety of the system.
Be sure to connect a fuse with a breaking current 1.5 to 2 times larger than the rated current to the Limit Switch in parallel in order to protect the Limit Switch from damage due to short-circuiting.
When using the Limit Switch for the EN ratings, use the gl or gG 10A fuse.
Do not use the Limit Switch as a stopper.
Actuation of the Limit Switch over a long time may deteriorate parts of the Limit Switch and a releasing failure may result. Be sure to check the condition of the Limit Switch regularly.
When using the Limit Switch as a safety component, be sure to check the system design for both operational and circuit safety.

## $\square$ Correct Use

## Operating Environment

The Limit Switch is intended for indoor use only. Using the Limit Switch outdoors may result in a malfunction.

## Tightening Torque

Be sure to tighten each screw of the D4D- $\square$ R properly, otherwise the D4D- $\square$ R may malfunction.

| No. | Type | Torque |
| :--- | :--- | :--- |
| 1 | M3.5 terminal screw | 0.59 to $0.78 \mathrm{~N} \cdot \mathrm{~m}$ |
| 2 | Cover mounting screw | 0.78 to $0.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 3 | Head mounting screw | 0.78 to $0.88 \mathrm{~N} \cdot \mathrm{~m}$ |
| 4 | Lever mounting screw | 1.57 to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ |
| 5 | M4 body mounting <br> screw | 0.49 to $0.69 \mathrm{~N} \cdot \mathrm{~m}$ |
| 6 | Connector | 1.77 to $2.16 \mathrm{~N} \cdot \mathrm{~m}$ <br> 1.37 to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ (see note) |
| 7 | Cap screw | 1.27 to $1.67 \mathrm{~N} \cdot \mathrm{~m}$ |

Note: This torque range applies to $1 / 2-14$ NPT connectors.

## Mounting

Fasten the Switch with two M4 Allen-head bolts and washers. Provide a stud with a diameter of $4 \frac{-0.05}{-0.15}$ and a height of 4.8 mm max. at two places as shown below so that the Switch is firmly fixed at four points.

## Mounting Holes/Studs

Standard 1-conduit

$4_{-0.15}^{-0.05}$ dia. height, 4.8 max.
2-conduit

## Changing the Head Direction

If the head direction has been changed, check the torque of each screw and make sure that the screws are free of foreign substances, and that each screw is tightened to the proper torque.

## Wiring

- Do not connect the bare lead wires directly to the terminals but be sure to connect each of them by using an insulation tube and M3.5 round crimp terminals and tighten each terminal screw within the specified torque range.
- The proper lead wire is 20 to 14 AWG ( 0.5 to $2.5 \mathrm{~mm}^{2}$ ) in size.
- Do not touch the terminals while power is being supplied in order to avoid an electrical shock.

Perform wiring for the crimp terminals in the orientation shown below, so that they do not rest on the casing or the cover.

Incorrect

## Processing the Conduit Opening

Tighten the connector to a torque of 1.8 to $2.2 \mathrm{~N} \cdot \mathrm{~m}(1.37$ to $1.77 \mathrm{~N} \cdot \mathrm{~m}$ if it is a $1 / 2-14 N P T$ ). Excessive tightening torque may damage the casing. To satisfy IP65, apply sealing tape to the connector conduit. The diameter of the cable must be suited to the corresponding connector.
Insert a cap screw provided with the D4D- $\square$ R into any unused conduit opening of the D4D- $\square \mathrm{R}$ and tighten the cap screw to a torque of 1.27 to $1.67 \mathrm{~N} \cdot \mathrm{~m}$.

## Recommended Connector

| Conduit size | Manufacturer | Model | Applicable cable <br> diameter |
| :--- | :--- | :--- | :--- |
| G1/2 | OMRON | SC-6 | 7.5 to 9.0 mm |
|  | LAPP <br> (see note 1) | ST-PF1/2 <br> $5380-1002$ | 6.0 to 12.0 mm |
|  | Ohm Denki <br> (see note 2) | OA-W1609 | 7.0 to 9.0 mm |
|  | LAPP <br> (see note 1) | ST13.5 <br> $5301-5030$ | 5.0 to 12.0 mm |
| $1 / 2-14 N P T$ | LAPP <br> (see note 1) | ST-NPT1/2 <br> $5301-6030$ | 6.0 to 12.0 mm |

Note: 1. LAPP is a German manufacturer.
2. Ohm Denki is a Japanese manufacturer.

## Maintenance and Repairs

The user must not maintain or repair equipment incorporating any D4D- $\square$ R model. Contact the manufacturer of the equipment for any maintenance or repairs required.

## Others

With rubber roller lever models, the rubber roller may turn white with the passage of time, but this will not affect the quality of operation.

[^0]:    Note: The D4D- $\square$ R uses NBR.
